

Algerian Community of Endourology & Laparoscopic Surgery
" A . C . E . L . A . S "

First International Meeting in Endourology

Endourology I : URINARY UPPER TRACT « UUT »

« Endorsed by EAU Section of Urolithiasis (EULIS) »

21, 22 December 2017 - Sétif, Algeria

Live Surgery

EAU: EULIS HOT SESSION(URS & PNL COURSES)

Topics :

- Stones.
- Uretero Pelvic Junction (UPJ)
- Tract Urinary Carcinoma (TUC).

Submission Abstracts is open now for:

- Oral presentation.
- Moderated & Unmoderated e-Poster.
- Videos.
- Cases Presentation.

“Please Read Carefully The Speakers Rules” (website / FaceBook)

Deadline: October 31th 2017

KARL STORZ – ENDOSCOPE
THE DIAMOND STANDARD

DR Hichem KOUICEM **ACELAS Chairman, Algeria**

- 2001: Founder and Member of the Algerian Association of Urology (AAU).
- 2005: Clinical head of my own surgical clinic in Setif (Clinique Les Pins) specializing in the Clinical practice of ureteroscopy and shock waves lithotripsy.
- 2009: Founder of the first National Urolithiasis Committee of the Algerian Association of Urology (AAU).
- 2009: Chairman of the National Urolithiasis Committee of the Algerian Association of Urology (AAU).
- 2012: Achievements of the National Patient Record File of Ureteroscopy
- 2014: European Association of Urology “EAU” International Membership.
- 2016: Chairman of the Algerian Community of Endourology and Laparoscopic Surgery “ACELAS”.
- 2016: U-merge National Delegate.
- 2016: Challenges in Endourology: Faculty Member.
- 2016: EAU: EULIS Associate Member.
- 2017: U-merge membership
- 2017: U-merge ambassador for Algeria.
- 2017: Endourological society Membership.
- 2017: SIU Membership.

=====O=====

Dear Colleagues and friends,

ACELAS Algerian platform belonging to Maghreb aims for the minimally invasive surgery in urology with its two branches: endourology and laparoscopic surgery. ACELAS strives to promote the Algerian urology of the future, whose main support is the new generation of urologists. ACELAS offers an opportunity for training, exchange and expertise for our young urologist eager to know more. ACELAS with its international meetings category, will consolidate the relationship bridge with our foreign expert friends. ACELAS are committed to encouraging any initiator who generates ideas for an urology that meets the expectations of our patients. Welcome to you.

Yours faithfully,
H.KOUICEM

Cher (es) Ami (es) et collègues,

ACELAS plate forme Algérienne appartenant au Maghreb prône la chirurgie mini invasive en urologie avec ses deux bras : endourologie et la chirurgie laparoscopique.

ACELAS s'attèle à promouvoir l'urologie algérienne du future ayant pour principal support la nouvelle génération d'urologue.

ACELAS offre une opportunité de formation, d'échange et d'expertise pour notre jeune urologue avide de savoir.

ACELAS avec ses meetings de catégorie international consolidera le pont relationnel avec nos amis experts étrangers.

ACELAS s'engage à encourager toute initiative génératrice d'idée pour une urologie à la hauteur des espérances de nos patients.

Bienvenu à vous.

Cordialement,
H.KOUICEM

Olivier TRAXER

**Professeur d'Urologie Université Paris-6
Pierre et Marie Curie
Responsable de l'unité Endourologie et
Lithiase Rénale
Service d'Urologie (Pr O. Cussenot)
hôpital Tenon Paris.**

COMMISSIONS UNIVERSITE-HOPITAL (actuelles)

- Membre de la commission d'attribution des HDR de l'Université Paris-6 Pierre et Marie Curie
- Membre du conseil du bloc opératoire Hôpital Tenon
- Membre de la commission d'Équipement du bloc opératoire

AUTRES MISSIONS ET POSITIONS ACTUELLES (Sociétés nationales et internationales d'Urologie)

- Membre du Board de l'ESUT : European Section of Urotechnology: section Endourologie
- Membre Board de l'EULIS : European Urolithiasis Society
- Membre de l'EAU office guidelines : Panel Technology group guidelines
- Membre du Board de l'ESU (European School of Urology-EAU)
- Membre du Board de l'EUREP (European Residents Educational program)
- Administrateur de l'AFU (Association Française d'Urologie)
- membre du bureau de l'AFU poste de trésorier adjoint.
- Membre du Board des Directeurs de la Société d'Endourologie

APPARTENANCES SOCIETES ET ASSOCIATIONS (passées et présentes)

- Membre de l'AFUF et représentant Ile de France (1996-1999)
- Membre du Conseil Scientifique de l'Université Paris-6 Pierre et Marie Curie (représentant étudiant)
- Membre du comité Lithiase de l'Association Française d'Urologie (CLAFU)
- Responsable CLAFU (Comité Lithiase AFU)
- Membre de la première consultation internationale sur la lithiase (ICUD 2001)
- Membre de l'Association Française d'Urologie (AFU)
- Membre de la Société d'Endourologie
- Membre de la Société Félix Guyon (SFG)
- Membre de l'Association Européenne d'Urologie (EAU junior-member)
- Membre de l'EAU (delegate member)
- Secrétaire du congrès d'Urologie de l'AFU
- Membre de la deuxième consultation internationale sur la lithiase (ICUD 2006)
- Membre de ESUT
- Administrateur AFU (Association Française d'Urologie)
- Membre de l'EAU office guidelines : section Urolithiasis

1ST INTERNATIONAL MEETING IN ENDOUROLOGY

- Membre du board de l'EULIS (membre correspondant pour l'ESUT)
- Membre de l'EAU office Guidelines section Technology Panel
- Société d'Endourologie : membre du groupe « bylaws »
- Administrateur société Urodiffusion
- Membre de la Société Internationale d'Urologie (SIU)
- Membre de l'Association Américaine d'Urologie (AUA)
- Membre de la troisième consultation internationale sur la lithiase et responsable section « Urétéroscopie » (ICUD 2014)
- Administrateur société Urodiffusion

 - Progrès FMC en Urologie : 2007
 - Progrès en Urologie : 2013-

” Chers amis, chers collègues,

C'est un immense plaisir pour moi de participer à ce nouvel événement organisé à Sétif par le Dr Hichem KOUICEM et la société ACELAS. Le développement de l'Endourologie ces 10 dernières années a été spectaculaire dans le monde entier. Il est indispensable de pouvoir partager nos expériences professionnelles, d'échanger sur nos pratiques et de confronter nos avis respectifs. Cette réunion sera un moment privilégié où nous pourrons faire tout cela en collaboration avec les sociétés savantes comme l'ESUT et l'EULIS. Le Docteur Hichem KOUICEM, propose un programme complet très attractif qui remportera un très vif succès sans aucun doute. On se réjouit tous de se retrouver à Sétif les 21-22 décembre 2017.”

- International active member of ACELAS

“Every great trip begin with a step,

The trip was first a dream. The one where all Maghreb urologists could learn, develop, improve and practice endourology and laparoscopy according to international standards on site, in the Maghreb region.

ACELAS is trying to realize that dream.

First of all, the baseline of any scientific development is «sharing», we hope that the main promoting energy of these meetings will be based on that main idea.

In the Maghreb region, we have many epidemiologic similarities and almost the same technical and equipment difficulties.

The international scientific leaders would help us in installing « best practice medicine », but we have also the capabilities and the duty to find our own adapted solutions”.

Khaled ATALLAH

Nasr Abdelmageed Rahman Ramadan Sudan

- FRCS (Glasgow)
- MD urology
- Military hospital Khartoum
- President of Sudanese Urological Association
- Senior Consultant Urologist and Head of Department, Sudan Military Hospital, Omdurman- Military Rank: Major General
- General manager of Alwidad medical company and Alwidad Specialized Hospital
- Associate Professor at; Azhari Medical University, Ahfad Medical College and Karari University; Sudan
- Member in all international urological societies

Ali Serdar Gözen FEBU

Dr.Gözen studied Medicine at the Universities of Cerrahpasa/ Istanbul and Trakya/Edirne in Turkey. He started in 1990 with his urological education in Turkey and in Erlangen University and Klinikum-Nürnberg in Germany. He has worked as consultant urologist between 1997 -1999 two years in Martin-Luther University in Germany in the kidney transplantation unit. He became assistant Professor in 1999 and started with the modern endourological operations in Turkey. Dr.Gözen joined in 2004 the team in SLK-Kliniken Urology Department in Heilbronn, Germany. He accomplished his laparoscopy and robotic surgery education and involved in many scientific studies. He became FEBU in 2007 and associate Professor in 2008. He is an active member of the laparoscopy training section of EAU Section of Uro-technology (ESUT) and ESU training board and responsible in SLK-Kliniken Urology Department in Heilbronn for the laparoscopic and robotic training and fellowship program. Dr Gözen serves frequently as coordinator or course director and faculty for national and international laparoscopy and robotic educational courses and has organized and involved till date in more than 60 international laparoscopy&robotic surgery courses. He is active member of various urological societies and reviewer of a variety of international Journals.

Dr. Noor NP Buchholz
MBBS (D), MD (CH), FSSU (CH), FKNMG (NL), MFMLM (UK)

Trained in Germany, Switzerland and Australia. He has Worked as a Consultant Urologist in Pakistan and in the Netherlands, and

Director of Endourology and Stone Services at the Royal London Hospital for 14 years in the United Kingdom.

- In 2014, he has moved his practice to Dubai/ UAE.

- Expert in minimally invasive urological surgery in general, and stone treatment in particular.

- Worldwide recognised expert in shockwave lithotripsy, the treatment of urinary stones, endourology and laparoscopy.

- Expert in the novel technology of permanent metal stenting of the urinary tract.

- For more than 10 years, Dr. Buchholz has been one of only 46 trainers worldwide recognised by the International Endourology Society (IES) for Endourology and Stone treatment, and the first such recognised trainer in Europe by the European Board of Urology (EBU).

- Board member of the stone section of the European Association of Urology (eULIS-EAU) which is responsible for guidelines, training and standards in stone treatment, both in European and worldwide.

- Member of the Board of Directors of the Société Internationale d'Urologie (SIU).

- Founder and chairman of Experts in Stone Disease (ESD) organising global scientific meetings.

- Founding Director of U-merge (Urology in emerging countries), a society that been created to promote medical and urological education and training in emerging countries to elevate the worldwide standard of urological care for patients. As such he organises teaching and training activities from one-to-one tutoring to major international conference.

"It gives me a great pleasure to support the 1st ACELAS Meeting in Setif. U-merge here fulfils it's mission of knowledge transfer from West to East, from the developed to the developing world by encouraging a number of well renown international faculty to volunteer to give their time to support to this meeting in the name of U-merge. U-merge will hold a designated workshop and several lectures. U-merge has been re-structured and is now a global society of likeminded, philanthropic and enthusiastic academic urologists and scientists supporting a whole array of different activities. Only recently, our new website has been launched: www.u-merge.com

Paired with the well-known Algerian hospitality, I am sure this meeting will raise the standards of scientific excellence in Algeria. It is well worth attending for trainees and seasoned urologists alike.

U-merge will do it's best to make this meeting a great success".

Guohua Zeng China

Professor Zeng is currently the Vice- President of The First Affiliated Hospital of Guangzhou Medical University, Chief of Guangdong key lab of Urology and Chief of Guangzhou Urology Research Institute.

He completed his Master of Urology training in 1992, and his PhD in Urology in 2000. Clinical endourology fellowship at UT Southwestern Medical Center at Dallas in 2007. As an experienced endourologist, he has finished more than 12000 endourological procedures including all kinds of PCNLs, rigid URS and RIRS procedures and Uro-laparoscopic procedures. Leading the development of RIRS in China, he and his group perform more than 1000 RIRS per year. Prof. Zeng and his colleagues also created a unique mini-PCNL technique, namely Chinese Mini-PCNL, in which more than 30000 Chinese Mini-PCNLs surgeries has been performed by Prof. Zeng and his team with good clinical outcome. He also invented a new minimally invasive technique in treatment of middle size renal stones, called “Super-Mini-PCNL (SMP)”.Main innovation in SMP technique is irrigation and suction in the same sheath, it totally solve all problems in Mini-perc technique, SMP technique has the advantages of a good irrigation , fast stone fragments evacuation and lower intrarenal pressure, So SMP technique is a conception revolution for mini-perc technique.

Professor Zeng and his group firstly finished a national survey of stone disease incidence and related risk. They firstly set up a normal value of 24hrs Urine in Chinese population. As for basic research, Professor Zeng focus on relation between calcium channel, estrogen and stone formation.

Serving the position as the Director of Endoscopic Training Centre, Ministry of Health, PRC, Prof. Zeng has led and organized more than 330 endourological stone management workshops. At least 3100 Chinese residents and more than 30 international residents from Italy, UK, India,Philippines,Jordan and Nepal have been trained in his Endoscopic training center. Trainings provided in this center were certified by Endourology Society fellowship program in August 2014.

2012, Prof. Zeng, Prof Zhangqun Ye, and Prof Kemal Sarica together set up a international organization only specialized in Urolithiasis, named as International Alliance of Urolithiasis(IAU),So far more than 300 stone disease doctors from 30 countries have become IAU members. Five IAU annual conferences were held at China, Nepal and India in Nov each year. IAU will provide a academic exchange platform for all stone disease doctors in the world.

Prof. Zeng has gained 5 research projects for stone disease from National Natural Science Foundation. More than 100 academic papers have been published in national and international journals, 10 books about stone disease have been published.

Andreas SKOLARIKOS

Professor of Urology at Athens Medical School of the National and Kapodistrian University

Athens, Greece.

Professor of Urology at Athens Medical School of the National and Kapodistrian University

Athens, Greece.

- Consultant Urologist at the 2nd department of Urology of Athens Medical School hosted in Sismanoglio Hospital, which is located in Athens, Greece.

- Experts in Endourology and Laparoscopic and Robotic Surgery.

- Worked for two years (2000-2002) in UK at the University of Newcastle upon Tyne in Newcastle,

- Participated in several research protocols, mainly as principal investigator.

- Received several honors and awards, most importantly becoming a fellow of the European Board of Urology scoring the highest degree (94/100) in 2001.

- Active member of several professional Societies such as the Hellenic Urological Society (HUA) -

- Vice Editor of its Journal, former Chief responsible for Education,

- Member of the Scientific and Professional committee of HUA, Secretary and Chairman of the Endourology and Laparoscopic section as well as International Societies such as the European Association of Urology (EAU)

- Board member of the EAU Urolithiasis guideline panel,

- Board member of the European Society of Urotechnology (ESUT)

- Chairman of the Endourology Section of ESUT,

- Associate Member of the European Urolithiasis Society (EULIS)), and of the Endourology Society (Member of the Audit Committee of the Clinical Research Office of Endourology (CROES)).

EAU Section of Urolithiasis (EULIS)

Kemal SARICA M.D, Ph. D
Professor of Urology, Turkey Chief
Department of Urology, Health sSci sciences Univer-
sity, Dr. Lutfi KIRDAR
research and training Hospital Chairman, EAU Section of
Urolithiasis (EULIS)

“On behalf of the board members of EAU Section of Urolithiasis (EULIS) it is a real honour and pleasure for me to join to the this international “urolithiasis workshop” focusing on the all aspects of stone disease in Algeria. The treatment of stone disease has experienced tremendous changes as a result of the improvements in instrument technology in the last three decades. Additionally the increasing experience in the use of newly designed fine and effective devices led the endourologists to treat more complex stones in a successful as well as practical manner. New lithotripters in SWL, miniaturization in PNL and the use of fine, thinner instruments with Ho-YAG laser systems in URS are the major features of the new era in the endourologic treatment of stone disease. However it is clear that despite all these encouraging and successful outcomes in the minimal invasive surgical management of urinary stones, unfortunately very limited progress has been observed in the pathophysiology and medical management of stone disease.

I believe that this meeting will be a great chance to encourage scientific exchange regarding every aspect of new advances and researches in urolithiasis. It will also give us the chance of discussing the recent scientific developments and clinical applications in the pathophysiology, metabolic evaluation, medical and surgical treatment of stone disease. with the successfully organized key note lectures, round table discussions, scientific sessions and live surgery demonstration. As I see, an excellent faculty of internationally renowned experts will participate to the meeting to share their valuable experiences with the participant physician coming from different parts of the world. Once again, I am highly thankful to the chair as well as to the members of organizing committee of this conference for giving EULIS to join and the chance of coming together and sharing our experience in this very important but “orphan” part of urology. I am sure that this conference will prove itself to be highly successful both from scientific as well as social aspects. It will also be a great chance for us to visit the beautiful city of Setif and taste the well-known traditional Algerian hospitality demonstrated by the member-brothers of Algerian community of endourology and laparoscopic Surgery”.

1RST INTERNATIONAL MEETING IN ENDOUROLOGY

- LS II: Mini PNL In Prone Position. Live Surgery
Supervisor: Andreas SKOLARIKOS, Greece
- LS III: SMP In Prone Position Live Surgery
Supervisor: Guohua ZENG, China.

Topics:

- Prone Versus Modified Supine Position In Percutaneous Nephrolithotomy Literature Review.
By: M.M.SAKER, Urology department, Daksi - Constantine, Algeria.
- Risk Factors And Management Of Complications Of Percutaneous Nephrolithotomy.
By: A.ALANI Urology department, Daksi - Constantine, Algeria.
- Tips and tricks in PNL
By: K. SARICA, Turkey.

11: 00 - 11: 30: *Coffee break (At the booth companies)*

13: 00 - 14: 00: *Lunch Box*

14: 00 - 18: 00: Experiences & Debates Session

14: 00 – 15: 00 Chair: O.TRAXER (France)

Co- chairs: A.DAHDOUNH (Algeria)-D.PREZIOSO (Italy)- R.BENRABEH (Algeria)-
K.ATALLAH (Tunisia)-S.OULARBI (Algeria).

- UPJ: IN 2017, Endourology or reconstruction that is the question?
By: A. SKOLARIKOS, Greece
- Endoscopic Treatment Of Upper Tract Urothelial Carcinoma
By: N.BUCHHOLZ, AUE.
- URS & PNL: For lower pole stones 1,5 Cm (PRO /CON)

1ST INTERNATIONAL MEETING IN ENDOUROLOGY

Judges: K. ATTALAH (Tunisia), R.BENRABEH (Algeria)

Debaters: . URS: O.TRAXER, France (5mn)

PNL: K.SARICA Turkey(5mn)

15:00-15:45: And what about PNL?

Chair: A. SKOLARIKOS, Greece.

Co-Chairs: N.BUCHHOLZ, UAE-M.KHELLAFI

(Algeria)-A.ARIBI (Algeria)

K.ADJALI (Algeria). A.MOUATS (Algeria).

- From Metabolic Evaluation To The Diet Therapy In Stone Former Patients.

By: D.PREZIOSO, Italy

- Decreased Susceptibility To Commonly Used Antimicrobial Agents In Adult Patients With

Urinary Tract Infection At Infectious Diseases Department, Setif Teaching Hospital:

Need For Country Specific Guidelines

By: A.OUYAHIA, Department of Infectious diseases, Teaching Hospital, Setif-Algeria

- Prone Or Supine: what's is your vote?

. **Judges:** A. SKOLARIKOS ,Greece - N.BUCHHOLZ, UAE.

. **Debaters:** k. ATALLAH, Tunisia For Prone Position (5mn)

T. LOUNICI, Algeria For Supine Position (5mn)

- Is SMP the new way in 2017?

By: G. ZENG, China

16:00-16:30: Coffee break (At the booth companies)

16:00-18:00: Meet Experts and Expertise your Work (Prize for the Best)

Chair :O. TRAXER (France)-

CO-chairs: N.BUCHHOLZ (UAE)-K.ATALLAH (Tunisia)-

K.SARICA (Turkey). G.ZENG (China) –
A.GOZEN, (Germany).

Oral presentation

- Minimally invasive treatment of urolithiasis; when reality does not go beyond fiction.

By K. ATOUI, Urology Department- University Hospital, Annaba-Algeria.

- Urolithiasis Treatment in Algeria: news epidemiological that changes our practices.

By: R.BENRABEH, Military Hospital, HCA-Algiers, Algeria

- Place of the Extracorporeal Shock Wave Lithotripsy (ESWL) in Coralliform Lithiasis.

By: M.N.BENHATCHI – Centre d Urologie, Oran, Algeria.

- Adult Ureteroscopy applied to children is it feasible and safe?

By: M.AZLI, Military Hospital, HCA-Algiers, Algeria

- Mini percutaneous in the management of renal lithiasis

By: C. OUANEZAR, Urology Department EHU – Medical University, Oran –Algeria.

- Mini-invasive Percutaneous treatment of renal lithiasis: Experience of the department of Urologic surgery at the military hospital of Oran.Algeria.

By: R. CHOUAKI. Department of urologic surgery at the military hospital of Oran.Algeria.

- Les stenoses de l’anastomose uretero-vesicale après Transplantation Renale.

By: S.YEBEDRI; Urology department, University Hospital, Tizi-Ouzou, Algeria

- Laparoscopy of the upper urinary tract in children: first results of a mono-centric

Experience.

By: S. Ait Yahia, Department of Pediatric Surgery, and University

Hospital-Setif, Algeria.

- Laparoscopic repair of Pelvi-ureteric Junction Obstruction
By: M.SAIDANI, Military Hospital, HCA-Algiers, Algeria

Video Presentation

- Minimal invasive treatment of complex urinary lithiasis.
By: A.D.Lansari, Urology Department EHU Oran.Medical University of Oran, Algeria.
- Tips of the NLPC in supine position according to the morpho-type.
By: A.D. LANSARI, Urology Department EHU Oran.Medical University of Oran, Algeria.
- Traitement mini invasif des lithiases urinaires complexes
By: A.D. LANSARI, Urology Department EHU Oran. Medical University of Oran, Algeria.
 - Apport de l'urétéroscopie laser dans le traitement de l'infection urinaire.
By: S.BENSMAIL GUETITCHA, Private practice, Constantine, Algeria.
- Les clés du success d'une cure laproscopique d'une maladie de la junction: étape par étape.
By: S.KERROUMI, Urology Department EHU Oran.Medical University of Oran, Algeria.

Eposter Presentation

- Tumor de la voie excrétrice bilatérale synchrone , a propos d'un cas.
By: M ALLOUCHE, Urology Department, University Hospital Sidi Belabes, Algeria
- Echo guided percutaneous nephrostomy: the practical and

pedagogical virtues invested by

The urologist.

By: A.CHOUAKRIA, Urology Department- University Hospital, Annaba- Algeria.

- Pediatric Surgery Opens The Door For Minimally Invasive Surgery In Algeria: Mono centric

Experience And Perspectives.

By: N.BRINIS, Pediatric surgery university hospital of Batna, Algeria

- Bilateral stones as a cause of acute renal failure: case report.

By: A.BENDJEDOU, Military Hospital –HCA-Algiers, Algeria.

- Semi-Rigid Ureteroscopy: Mono-centric Study Concerning 348 Patients

By: S.HOUACHE, Urology Department EHU - Medical University, Oran-Algeria

- Initial Experience Of First 19 Flexible Ureteroscopy With Laser In HMRUO.

By: R.CHOUAKI. Department of urologic surgery at the military hospital of Oran. Algeria.

- Spontaneous Perforation of the Ureter: Clinical Presentation and Endourological Management

By: R.MEGRI. Urology department, Daksi - Constantine, Algeria.

18:00 - 18:30: “The meeting Opening Ceremony”

**19:00-20:00 ACELAS General Assembly
(For ACELAS Member only)**

Friday Dec. 22,2017:

08:00 -08:45: **Chairs:** N. BUCHHOLZ (UE)-
